A Panel Discussion on ChatGPT

Tuesday, April 25, 2023

1:30 p.m. - Library Main Floor

Dear Students and Staff,

We are pleased to invite you to an exciting panel discussion about ChatGPT. The event will bring together a dynamic group of faculty from various departments, including English, Computer Science, Philosophy and Library Science to discuss the impact of ChatGPT on our society and the future of artificial intelligence.

ChatGPT is an artificial intelligence model designed to generate human-like responses in chat conversations. It has recently gained popularity and sparked debates about the ethics and potential consequences of its use.

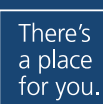

Our expert panel will provide insights from their respective fields and engage in an interdisciplinary conversation about the implications of ChatGPT on language, culture, creativity and information literacy. Attendees will have the opportunity to pose questions and participate in an interactive Q&A session with our distinguished faculty.

Please join us on Tuesday, April 25 at 1:30 p.m. We look forward to seeing you and learning together.

Note: Message generated by ChatGPT with the prompt "Write a 150-word message inviting the college campus community to attend a panel discussion among English, Computer Science, Philosophy and Library Science faculty about ChatGPT."

ChatGPT, 28 March, 2023 <https://chat-gpt.org/chat>.
